Edge® 1030 Plus & 130 Plus
GPS Cycling Computers

EDGE 1030 PLUS KEY FEATURES:

|		
IMPROVED	BEST IN CLASS SETUP	Be ready to ride in moments, instead of wasting time configuring settings. Get prepopulated custom ride profiles based on your previous Edge, ride types, your sensors and the most popular set-ups from our users.
IMPROVED	BATTERY LIFE[3]	24 hour battery life, in demanding use. Edge 1030 Plus will get 24 hours of battery life even in demanding usage, and double that when used with the optional Garmin Charge™ power pack.
NEW	SYNC TRAINING PLANS	Get your indoor and outdoor training plans from Garmin Connect or sync seamlessly to your Edge from other apps including TrainingPeaks® and TrainerRoad.
	DYNAMIC PERFORMANCE MONITORING[1]	Get more insight about how your body is responding to training. Track VO2 max, recovery time, training load, training load focus and more.
NEW	DAILY WORKOUT SUGGESTIONS	For training guidance that takes you and your fitness level into account, get daily ride recommendations based on your current training load and VO2 max[1].
	CLIMBPRO	Automatically see the remaining ascent and grade when you're climbing while following a route or course. This helps you gauge your effort and see how much you have left to suffer.
NEW	MTB DYNAMICS	Track the epic details of every ride with new mountain biking metrics such as jump count, jump distance and hang time. And measure the difficulty of a ride or how smoothly you descend with our Grit and Flow metrics.
IMPROVED	GARMIN CYCLE MAP	Ride with preloaded maps that have wider coverage than ever before and provide information about elevation data and points of interest and allow you to search for addresses.
NEW	OFF-COURSE RECALCULATION	Feel free to pause route guidance and off-course notifications while you go off-course to explore. When you're ready to get back on track, Edge 1030 Plus will show you the way.
IMPROVED	CREATE MORE COURSES	Create roundtrip courses directly on your Edge, in our Garmin Connect app, or plan them on other platforms such as Strava and Komoot then sync them automatically to your Edge.
	TRENDLINE POPULARITY ROUTING	Using the billions of miles of ride data that cyclists have uploaded, Edge 1030 Plus can find the best route — choosing from roads (and trails) most travelled.
IMPROVED	PRELOADED TRAILFORKS APP AND TRAILS	Import planned routes directly to the Edge 1030 Plus. These routes take into account trail conditions and rider ability to help you have a better time.
	CYCLING AWARENESS	Pair the Edge 1030 Plus with Varia rearview radar and lights so you can easily see and be seen.
IMPROVED	LIVETRACK SESSIONS	Create LiveTrack sessions direct from your Edge and let friends and family follow your real-time location[2] and even view your entire preplanned course.
	INCIDENT DETECTION AND ASSISTANCE	Sends your location to preloaded emergency contacts if it detects an incident[2] or manually share if you get into mechanical difficulty.
NEW	INREACH COMPATIBILITY	Stay in touch wherever you ride by pairing Edge with an inReach® device. View and reply to messages, share trip data and trigger interactive SOS alerts[4] with an inReach subscription.
